

How to make a request on SFARI Base

Simons Foundation Autism Research Initiative (SFARI) provides researchers access to data and biospecimens collected from research participants.

You must be the PI (listed on IRB letter) of your project to place a request

Go to base.sfari.org, and create an account.

Once logged in, select 'New Request'.

A project can be selected or newly created.

- A project can be reused to make multiple data requests over time as more data are available.
- Using requested items for another project/scientific question must be approved independently in SFARI Base.
- Upload your IRB approval letter (must include PI name, study number, and study title) and fill in IRB expiration date (or indicate exempt/no expiration).

Proceed through to select the data requested.

- Select all data/samples that you need.
- Review the final list of requests in the gray box on the right side of the page.
- List the name(s) of the researcher(s) who may be using these data.
- Complete the three data use/sharing policy checks.
- Submit request.
- The Researcher Distribution Agreement (RDA) process will be initiated once a researcher's request has been approved.

You will be alerted when your request is accepted about 2-3 weeks. For follow-up questions, email collections@sfaribase.org.
