# Simons Searchlight Registry Update SLC6A1

March 2021

#### About this Report

The report shows data collected in Simons Searchlight from SLC6A1 participants. Data from other published research are not included.

Data presented in this report come primarily from the medical history phone call. The data are current and may reflect information not yet available in an official researcher data release.

Graphs show counts of individuals in each category. Individual participants may appear in more than one category if they report multiple conditions.

This report may look different from previous reports because we have streamlined our process and updated the variants.

#### <u>Variants</u>

Graphs include individuals with variants classified as pathogenic or likely pathogenic unless otherwise noted. Variants of uncertain significance (VUS) and less typical variants are not included.

We reassess variants classified as VUS annually.

#### Ages in Years

Individual participants: 37

### Participation & Registration
