Year in review

Caregivers were asked "When a vaccine for COVID-19 is available, do you intend for you and/or others in your household to receive it?" There was an increase in wanting to get the COVID-19 vaccine from our last survey.

Survey 4 Nov 2020

- 45% Yes (157 out of 352 people)
- 39% Unsure (136 out of 352 people)
- 16% No (57 out of 352 people)

Survey 5 June 2021

- 76% Yes (195 out of 255)
- 10% Unsure (25 out of 255)
- 14% No (35 out of 255)

"Concerned that it may not be safe" and "Confused about what information to trust" are the top two reasons why people were unsure.

People would feel more comfortable about household members receiving the covid-19 vaccine if there would be:

- "More time to evaluate its safety"
- "More time to evaluate its effectiveness"
- People would feel more comfortable about household members receiving the covid-19 vaccine if there would be:
