Simons Searchlight Registry
Update 1q21.1 duplication
September 2021

Ages in Years

Developmental & Behavioral Diagnoses

Intellectual Disability/Development Delay
Language Impairment
ADHD
Autism
OCD
Anxiety

Notes:
- Graphs show counts of individuals in each category. Individual participants may appear in more than one category if they report multiple conditions.
- Information on reported seizure types is included on the 2021 quarter 1 registry report available on simonssearchlight.org/research/1q21-1-duplication.

Participation & Registration
The information in this report is made possible by the active participation of the 1q21.1 duplication community! Progress for individuals in your community with a 1q21.1 duplication is shown below — log in to your simonssearchlight.org dashboard today to check for new surveys and tasks. Your data could hold the clues geneticists need to find answers.

STEP 1
Sign up online.

STEP 2
Provide your clinical lab report.

STEP 3
Schedule medical history phone call with a genetic counselor.

STEP 4
Fill out surveys.

STEP 5
Provide a blood sample if you are interested.

STEP 6
We follow up with you over time.

Information Spotlight: Sleep Concerns

The Children’s Sleep Habits Questionnaire is a survey used to understand sleep habits and possible sleep problems in children. All individuals were between 2 and 18 years of age. 30 children with 1q21.1 duplication are represented.

Top Sleep Problems in children with a 1q21.1 Duplication

- Others wake child
- Restless and moves a lot
- Takes long time to be alert
- Doesn’t fall asleep in 20 minutes

Overall Concern for Sleep Problems in Children with a 1q21.1 Duplication

- High likelihood of sleep problems (76.67%)
- Low likelihood of sleep problems (23.33%)

It is important to study sleep in children with rare neurodevelopmental disorders because these children are at higher risk for sleep problems, which can negatively impact their behavior and daily functioning.

- Alison Holbrook, PhD

Areas of Sleep Concern in 1q21.1 duplication*

- Daytime Sleepiness
- Breathing
- Parasomnias (e.g. sleepwalking)
- Night Wakings
- Sleep Anxiety
- Doesn’t Get Enough Sleep
- Delay Falling Asleep
- Bedtime Struggle

* The bars in the graph show the number of children with a more significant problem in each aspect of sleep. Top Sleep Problems is how the most frequently reported problem behaviors related to sleep. Areas of Sleep Concerns are made up of several sleep problem behaviors that are similar in type. Top Sleep Problems may not result in increased concern for Areas of Sleep if similar behaviors are not also a problem.
