**Simons Searchlight Registry Update for HIVEP2**  
December 2021

**Participant Age at Most Recent Interview**

**Developmental & Behavioral Diagnoses**

**Neurological Problems**

**Gastrointestinal Problems**

**How to Participate**

The information in this report is made possible by the active participation of the HIVEP2 community! Progress for individuals in your community with a HIVEP2 variant is shown below – log in to your simonssearchlight.org dashboard today to check for new surveys and tasks. Your data could hold the clues geneticists need to find answers.

**STEP 1**  
Sign up online.

**STEP 2**  
Provide your genetic lab report.

**STEP 3**  
Share your important medical history.

**STEP 4**  
Fill out surveys.

**STEP 5**  
Provide a blood sample if you are interested.

**STEP 6**  
Update us every year.

Notes:
- Graphs show counts of individuals in each category. Individual participants may appear in more than one category if they report multiple conditions.
- Graphs show data as of the last medical history interview completed on participants who have a pathogenic or likely pathogenic variant.

Data in these four graphs are from the medical history phone interviews collected in Simons Searchlight on 17 participants with HIVEP2.
Information Spotlight: **Deeper Dive into Sleep**

**The Simons Searchlight Sleep Supplement** is a custom survey. We worked with members of the Simons Searchlight community and sleep researchers to design these questions. It asks caregivers about children's sleep habits and the impact of health issues on sleep behaviors. The survey looks at children between ages 2 and 18 years of age. 10 children with HIVEP2 are represented.

### Getting Enough Sleep

- Usually (70%)
- Sometimes (30%)

### Medical issues related to sleep problems in children with HIVEP2*

- GI symptoms
- Movement disorder
- Seizures
- Anxiety

**Children with HIVEP2 fall asleep in 37 minutes on average.**

### Best Ways to Help Sleep: Community Recommendations*

- Withholding naps
- Sound or white noise machine
- Visual schedule
- Medication
- Parent lying in their bed until they fall asleep
- Bedtime routine or ritual

* Caregivers were able to select more than one answer
