

Simons Searchlight Registry Update ADNP

April, 2022

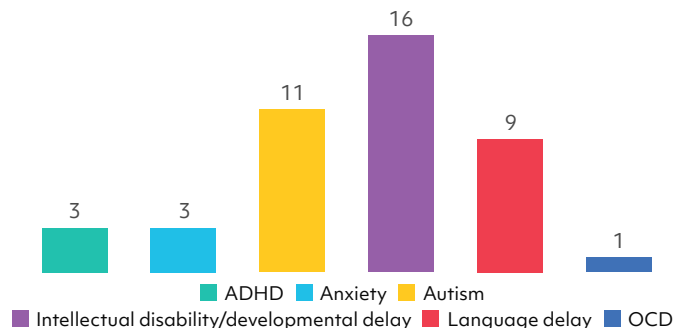

SIMONS
SEARCHLIGHT

Data in these four graphs are from the medical history phone interviews collected in Simons Searchlight on 17 participants with ADNP.

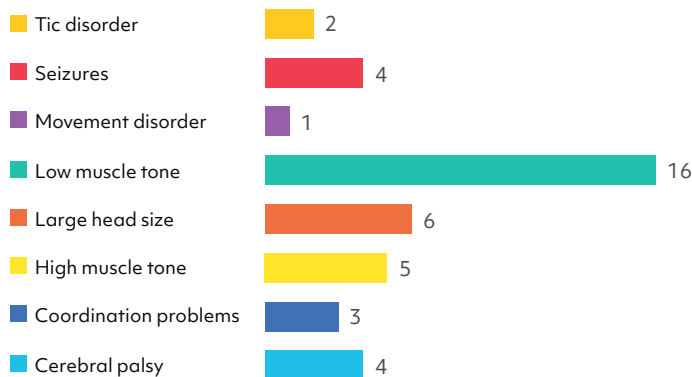

Ages in Years

Developmental and Behavioral Conditions

Neurological Problems

Gastrointestinal Problems

Notes:

- Graphs show counts of individuals in each category. Individual participants may appear in more than one category if they report multiple conditions.

How to Participate

The information in this report is made possible by the active participation of the ADNP community! Progress for individuals in your community with ADNP is shown below - log in to your simonssearchlight.org dashboard today to check for new surveys and tasks. Your data could hold the clues geneticists need to find answers.

STEP 1

Sign up online

36

STEP 2

Provide your genetic lab report

30

STEP 3

Share your important medical history

25

STEP 4

Fill out surveys

27

STEP 5

Provide a blood sample if you are interested

9

STEP 6

Update us every year

The **Quality of Life Inventory** is a scientific survey where we asked caregivers to describe how their family member with ADNP responds to life experiences.

It measures quality of life by looking at the following areas: physical health, psychological well-being, social relationships, leisure, and independence.

These graphs reflect the number of people who reported "Often" or "Very Often" for each question.

The questionnaire was given to family members of people 2 years and older.

6 people with **ADNP** are shown.

Health & Well-being

Has energy for daily activities

Is in good health

Is alert and aware

Sleeps well

Feelings & Emotions

In a good mood

Unsettled for no reason

Smiles

Displays aggression

Expresses happiness using body language

Feels upset or angry

Laughs or giggles

Withdrawn, low mood

Intentionally self harms

Dislikes changes in routine

Displays anxiety or agitation

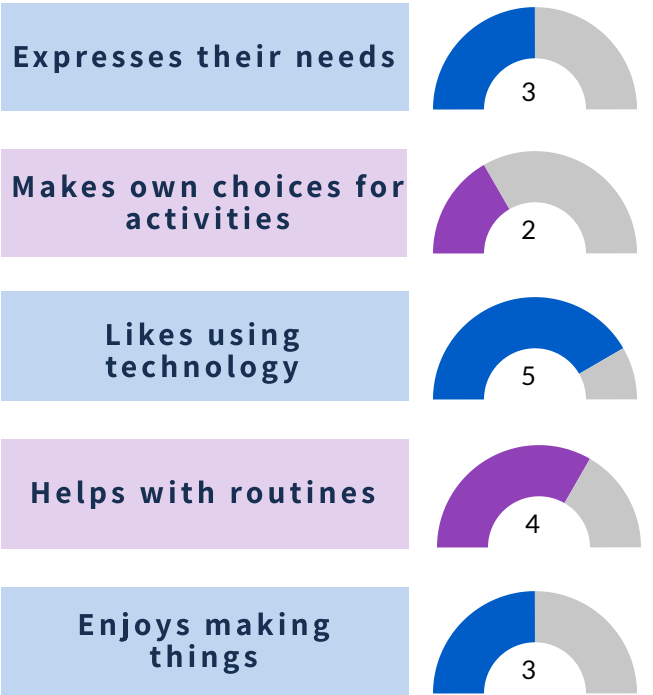

"Quality of life is a common survey of patient-centered outcomes in clinical trials and natural history studies."

- Alison Holbrook, PhD
