Simons Searchlight Registry Update CSNK2A1
April, 2022

Ages in Years

Developmental and Behavioral Conditions

Neurological Problems

Gastrointestinal Problems

How to Participate

The information in this report is made possible by the active participation of the CSNK2A1 community! Progress for individuals in your community with CSNK2A1 is shown below - log in to your simonssearchlight.org dashboard today to check for new surveys and tasks. Your data could hold the clues geneticists need to find answers.

Notes:
- Graphs show counts of individuals in each category. Individual participants may appear in more than one category if they report multiple conditions.
The **Quality of Life Inventory** is a scientific survey where we asked caregivers to describe how their family member with CSNK2A1 responds to life experiences.

It measures quality of life by looking at the following areas: physical health, psychological well-being, social relationships, leisure, and independence.

These graphs reflect the percentage of people who reported "Often" or "Very Often" for each question.

### Health & Well-being

- **Has energy for daily activities**: 78%
- **Is in good health**: 74%
- **Is alert and aware**: 74%
- **Sleeps well**: 65%

### Feelings & Emotions

- **In a good mood**: 74%
- **Smiles**: 74%
- **Expresses happiness using body language**: 74%
- **Laughs or giggles**: 65%
- **Unsettled for no reason**: 17%
- **Displays aggression**: 17%
- **Feels upset or angry**: 13%
- **Withdrawn, low mood**: 4%
- **Intentionally self harms**: 9%
- **Dislikes changes in routine**: 35%
- **Displays anxiety or agitation**: 43%
